

Technical Data Sheet

Benchmark 750-6000 with Edge Controller High Efficiency Boilers

The AERCO Benchmark (BMK) Water Boiler is designed for condensing application in any closed loop hydronic system. It delivers unmatched burner modulation to match energy input directly to fluctuating system loads to yield the highest possible seasonal efficiencies. And no other product packs as much capacity into such a small footprint.

Energy Efficient

To minimize emissions, the BMK Series is fitted with a low NO_x burner whose emissions will meet the most stringent NO_x and CO requirements. The fully modulating burner also maintains AERCO standards for energy efficiency, longevity, reliability and construction quality.

The BMK Series comes standard with AERCO's TComp™ O₂/air temperature compensation (a standard combustion control feature available with BMK boilers for 15+ years) provides precise combustion and maintains O₂ levels throughout the year for best combustion efficiency.

Application and Plant Design

The BMK boilers can be used as an individual unit or in modular arrangements and offers selectable modes of operation. In addition to controlling the boiler according to a constant set point, indoor/outdoor reset schedule or 4-20mA signal, one or more units can be integrated via Modbus communications protocol. For boiler plants ranging from 2-16 boilers, the AERCO Edge® built-in Boiler Sequencing Technology (BST)* can be utilized. The Benchmark can be easily integrated with a facility-wide Energy Management or Building Automation System.

*See BST System technical data sheet for additional system details and capabilities

Features

- Natural Gas, Propane, or Dual Fuel (model dependent)
- 20:1 Turndown Ratio (5%) depending on capacity
- TComp™ (O₂/air temperature compensation)
- Stainless Steel Fire Tube heat exchanger
- Capable of variable primary flow Installations
- NO_x Emissions capable of 9PPM or less @ all firing rates *depending on capacity
- Compact Footprint
- Ducted Combustion Air Capable
- Easy Open Access for Service
- Acceptable vent materials AL29-4C, Polypropylene, PVC, cPVC (model dependent)
- Reliable Quiet Operation
- Optional gas train with VPS (Value Proving System) for BMK Platinum 4000/ 5000N/ 5000/ 6000

Edge [i]

- Precise Temperature Control
- On-board Boiler Sequencing Technology (BST)
- Controls Options: Constant Setpoint, Indoor/ Outdoor Reset, Remote Setpoint, 4-20mA signal or ModBus

Specifications

*BMK5000/6000 low gas pressure option is available as a different style number. It operates between 10mbar and 25mbar of gas pressure.

1. Values are for natural gas FM compliant gas trains only. See Benchmark Gas Components & Supply Design Guide GF-2030 for propane, DBB & dual fuel gas train minimum gas pressure requirements.
2. See Benchmark Electrical Power Guide GF-2060 for Service Disconnect Switch amperage requirements.
3. BMK5000/6000 operating at standard gas pressure (> 35mbar) can achieve 9 ppm NOx.
4. Data listed is preliminary and is subject to change without notice.

Ratings

BMK Models	Min Input kW	Max Input kW	Max Output* kW	Efficiency Range	AHRI Efficiency 26.7° to 82.2°C
