

CFR[®] Cost-effective Boiler Built for Retrofits

A revolutionary high-efficiency boiler that safely reuses Category I/Type B venting for flexible, cost-saving installation for retrofit projects.

Reduce Install Time and Cost

Designed for maximum application flexibility. Existing piping, pumps, and vents can be safely re-used.

Make Startup a Breeze

Integrated controller with advanced features for a quick, intuitive startup and easy boiler sequencing.

Deliver Peace of Mind

Industry-first warranty against condensate corrosion and an extensive first-year service policy.

Product Specifications

- Category I/Type B
- 1500, 2000 and 3000 MBH
- Natural gas, FM train
- Up to 87.1% thermal efficiency
- Low NOx (<20 ppm)
- BACNet/Modbus comms
- Performance trending
- Outdoor reset

With over 86% efficiency, CFR is engineered to be the ideal hydronic solution for drop-in replacement projects.

It delivers greater energy savings, reliable operation, and an industry-best warranty combined with a design and features that simplify installation, reduce time and costs, and make startup and maintenance easy.

Simplify Your Next Retrofit Projects with CFR

No knocking down walls – fits through a 36" door

Fire-tube design allows for various piping configurations

Stack Guard™ sensor lets you safely use existing venting

Industry-best warranty and 20-30-year HX life expectancy

Effortless startup and boiler sequencing

No need for secondary and bypass pumps

Perfect Drop-in Replacement

Compact boiler designed for simplified installation and greater application flexibility
