

Benchmark NX

Benchmark Reliability Now in Light Commercial

The Benchmark® NX boiler, featuring AERCO's Edge® Controller, delivers reliable, efficient heat in a compact footprint, lower energy bills, and simplified integration for light commercial, multifamily, and institutional spaces. It's dependable performance without the cost and complexity of oversized equipment, engineered to fit your budget – and your space.

Experience the Benchmark NX Advantage

Optimizes Operation with Edge Controller

The Edge's advanced, integrated controls ensure operational efficiency, providing application flexibility, easy sequencing of up to 16 boilers, and timely maintenance alerts.

Cuts Energy Costs Year-Round

Up to 97.4% thermal efficiency, a 10:1 turndown ratio, and precise temperature control reduce fuel consumption.

Lowens Install and Lifecycle Costs

Compact footprint and right-sized capacity avoids overspending on oversized equipment and reduces piping and venting complexity.

Maximizes Efficiency and Performance

Backup-boiler operation during peak demand and primary-variable piping capabilities help ensure system operates at peak performance.

Offers Peace of Mind

Backed by AERCO's industry-leading warranty for long-term reliability and lower risk.

Specifications

- Gas condensing, fire-tube
- 399-500 MBH
- Up to 97.4% efficiency
- Up to 10:1 Turndown
- Stainless steel heat exchanger
- Advanced Edge Controller
- Low NOx (<20 ppm)
- Variable primary flow capability
- 10-year HX warranty
